HIGH TURBIDITY LEVELS IMPACT WATER SUPPLY SYSTEM IN ST. CATHERINE

WATERLOO, RICHARD HALL, PATTEN PARK AND SURROUNDINGS AREAS AFFECTED

The National Water Commission is advising that high turbidity levels have forced the shutdown of operations at the Waterloo water supply system located in St. Catherine. These issues will result in water supply disruptions to communities supplied by the facility.

Customers are being advised that once the conditions are favourable, the necessary remedial activities will be carried out to facilitate a re-start of operations and water supply distribution.

Areas affected: **Patten Park, Richard Hall, Waterloo, Waterloo Heights, Mount Dawson, Mount Moreland, Montaque Heights**

The National Water Commission apologises for any inconvenience caused and seeks to assure its valued customers that every effort will be made to restore water supply within the shortest possible time.
