**HIGH TURBIDITY LEVELS IMPACTING WATER SUPPLY DISTRIBUTION
KELLITS WATER FACILITY IN CLARENDON AFFECTED**

The **National Water Commission** is reporting that high turbidity levels at the water source have forced the shutdown of operations at the **Kellits Water Facility in Clarendon**.

Customers are being advised that the facility will be re-started as soon as conditions are favourable for water supply distribution.

Areas impacted: **Kellits, Crofts Hill, Good Hope, Tait, Pedro, Rhoden Hall, Guava Ground, Hickery, Comsie and Jericho**

The National Water Commission apologises for any inconvenience caused and seeks to assure its valued customers that every effort will be made to restore water supply within the shortest possible time.
