**HIGH TURBIDITY IMPACTING OPERATIONS AT GREAT RIVER
TREATMENT PLANT IN ST. JAMES**

The National Water Commission (NWC) is advising that high turbidity levels are impacting operations at the Great River Treatment Plant in St. James. As a result, the plant is currently producing at approximately 80 % of its capacity. Therefore, customers in St. James and Hanover who are served by the facility are experiencing no water, low water pressure or intermittent supply.

Areas likely to be affected in St. James include:

Queen's Drive, Leaders Avenue, Felicity, Mango Walk, Glendevon, Salt Spring, Brandon Hill, Rosemount, Cornwall Courts, Rose Heights, Farm Heights, Norwood, Paradise, Sun Valley Road, Rectory Drive, Catherine Mount, Albion, Reading Heights, Anchovy, Childermas, Lethe, sections of Comfort Hall, Wiltshire, Guava Walk, Spring Gardens, Belmont, Tower Hill and Moy Hall.

Areas likely to be affected in Hanover include:

Kew, Elgin Town, Johnson Town, Brisette, Hoist, Malcolm Heights, Cacoon, Dias, First Hill, Montpelier, Bamboo, McQuarrie, Woodland and Blenheim.

Operations will improve so soon as turbidity subsides.

The NWC regrets any inconvenience caused and craves the patience and understanding of its valued customers.
