UPDATE:

HIGH TURBIDITY CONTINUES TO AFFECT NIAGARA AND TANGLE RIVER FACILITIES, ST. JAMES

The National Water Commission is advising that the **Niagara Treatment Plant** and the **Tangle River Pumping Station** in **St. James** continues to be affected by levels of high turbidity.

As a result, customers in sections of **St. James** and **St. Elizabeth** who are served by the **Niagara Treatment Plant** as well as customers served by the **Tangle River Pumping Station** in **St. James** are still experiencing a disruption in their supply.

Affected areas include

In St. James

Johnson, Niagara, Tangle River

In St. Elizabeth

Jointwood, Elderslie and Accompong

The NWC assures customers that normal operation will resume as soon as turbidity subsides.

The NWC regrets any inconvenience caused and craves the patience and understanding of its valued customers.
